

A woman with long brown hair, wearing a white button-down shirt over a grey t-shirt and blue jeans, is lying back on a light-colored leather couch. Her eyes are closed and her arms are raised behind her head, suggesting she is relaxed or sleeping. Behind her is a large, stylized blue and white wavy graphic that resembles a breeze or water. The overall scene is bright and airy, emphasizing a sense of coolness and comfort.

**WITH AN AIR-SOURCE HEAT PUMP**

**mienergy**<sup>TM</sup>  
COOPERATIVE

Your Touchstone Energy® Cooperative 

# Year-round use. Versatile. Energy Efficient. Rebate eligible.

Do your research now to purchase an energy efficient air-source heat pump (ASHP) unit to help save money on your energy bills.

If you're in the market for equipment that both heats and cools your home, consider a heat pump. An ASHP can cool a home like a central air conditioner unit. As a bonus, it provides heat too.

Mini split systems work great in homes with no central venting systems, such as older homes or new additions.

**Both ASHPs and mini splits can be used for heating in the winter and cooling in the summer.**
