Your Touchstone Energy[®] Cooperative 

CHOOSE AN EFFICIENT, GREENER OPTION!

Do your research now to purchase an energy efficient air source heat pump (ASHP) unit to help save money on your energy bills.

If you're in the market for equipment that both heats and cools your home, consider a heat pump. An ASHP can cool a home like a central air conditioner unit. As a bonus, it provides heat too.

Mini split systems work great in homes with no central venting systems, such as older homes or new additions.

**Both ASHPs and mini splits
can be used for heating in
the winter and cooling in
the summer.**

Visit www.EnergyStar.gov for more information on approved units and check out MiEnergy's 2023 rebates and incentives for a \$300/ton rebate.

**Ask about the Inflation Reduction Act's
tax incentives for the purchase and install
of heat pumps!**
