

OFFICIAL NOTICE OF RATE CHANGE FOR MAY 1, 2023

This document is an Official Notice that includes specific legal language and information for members about a change in electricity rate tariffs.

On February 28, 2023, the MiEnergy Cooperative Board of Directors approved a change in electric rate tariffs affecting prices for the electric service that you receive. This will apply to your electricity consumption beginning May 1, 2023.

For rate classes with demand rates, no change has been made to the demand rate. The last rate change for members was in 2021 when the change resulted in an annual revenue decrease to the cooperative of .2% based on historical energy sales. The rate change in May will result in an annual revenue increase of 5% for the cooperative based on historical energy sales.

The impact of the rate change on your bill will vary depending on your rate class and energy consumption. The new rate tariffs are listed below.
