CHOOSE AN EFFICIENT, GREENER OPTION!

Do your research now to purchase an energy efficient air source heat pump (ASHP) unit to help save money on your energy bills. If you're in the market for equipment that both heats and cools your home, consider a heat pump. An ASHP can cool a home like a central air conditioner unit. As a bonus, it provides heat too. Mini split systems work great in homes with no central venting systems, such as older homes or new additions.

Both ASHPs and mini splits can be used for heating in the winter and cooling in the summer.

SHIFT TIPS**

Do The
**SUMMER
SHIFT**

Doing The Summer Shift helps keep electric rates affordable for all members. Anyone can participate by shifting or reducing energy use between the hours of 11 a.m. and 7 p.m. on summer weekdays.

Run the dishwasher after 7 p.m. and open the door to let the dishes air dry overnight.

Discover more Summer Shift Tips in the August MiNews or online at [www. MiEnergy.coop/summer-shift](http://www.MiEnergy.coop/summer-shift)
