### **Vegetation Management Manager**

MiEnergy Cooperative is seeking applications for the position of Vegetation Management Manager. A partial list of responsibilities includes: Lead and oversee MiEnergy's and Allamakee-Clayton's vegetation management programs, manage vegetation contractors, including contract performance, billing review, and compliance with safety, environmental, and quality standards. Conduct field audits and inspections to ensure adherence to OSHA, NESC, ANSI, DOT and environmental regulations. Develop and manage the annual vegetation management budget, serve as the escalation point for complex member concerns, delivering thoughtful and professional resolutions.

**A complete job description can be obtained by visiting the Dairyland Power Cooperative website or reach out to Jessica Church at [Jessica.Church@DairylandPower.com](mailto:Jessica.Church@DairylandPower.com) or the Minnesota, Iowa, or Wisconsin statewide websites.**

#### **Qualifications include:**

- An associate degree in Forestry, Arboriculture, Environmental Science, or related field, or International Society of Arboriculture (ISA) certification, or Utility Arborist certification plus (5) five years of experience in line clearance, vegetation management, tree work, or arboriculture is required. Previous leadership experience is preferred.
- Proficiency in computer skills, vegetation management software, GIS, and Microsoft Office Suite.
- Strong knowledge of tree biology, pruning standards, and vegetation control practices.
- A pesticide applicator license is required.
- A valid Driver's License is also required.

This is an hourly non-union position. Compensation is based on education and experience.

Applications will be accepted until the position is filled.
